b. "Raising of livestock" means the use of land or buildings for aquaculture, or the keeping of bees, cows, cattle, horses, sheep, swine, goats, chickens, ducks, turkeys, geese or any other domesticated livestock if permitted by the health department under the provisions of ch. 78.

c. “Community garden” means any use of land or a premises for the growing of crops, plants or other vegetation by a group of individuals or by a public or non-profit organization. This use includes composting and the raising of crops, native vegetation or fruit not otherwise in violation of this code. It also includes the sale of produce and ornamental crops grown on-site. This use does not include a commercial farming enterprise or outdoor storage facilities.

d. “Commercial farming enterprise” means a premises used to grow and harvest plants or compost for sale to the general public, retail businesses or wholesale establishments. This use does not include community gardens or outdoor storage facilities.

15. UTILITY AND PUBLIC SERVICE USES. a. “Broadcasting or recording studio” means an establishment containing one or more broadcasting studios for over-the-air, cable or satellite delivery of radio or television programs, or studios for the audio or video recording or filming of musical performances, radio or television programs or motion pictures. This term does not include a transmission tower.

d. “Transmission tower” means a structure designed to support one or more reception/transmissions systems. This term includes, but is not limited to, a radio tower, television tower, telephone exchange/microwave relay tower or cellular telephone transmission/personal communications systems tower.

e. “Water treatment plant” means an establishment engaged in operating a water treatment plant or operating a water supply system. The water supply system may include pumping stations, aqueducts or distribution mains. The water may be used for drinking, irrigation or other uses. This term does not include an industrial wastewater treatment facility.

f. “Sewage treatment plant” means a facility which operates a sewerage system and sewage treatment facilities that collect, treat and dispose of human waste.

g. “Power generation plant” means a facility that converts one or more energy sources, including but not limited to water power, wind power, fossil fuels or nuclear power, into electrical energy or steam. This term does not include a small wind energy system. A power generation plant may also perform either of the following:

g-1. Operation of a transmission system that conveys the energy or steam from the generation facility to a power distribution system.

g-2. Operation of a distribution system that conveys energy or steam from the generation facility or the transmission system to final consumers.

h. “Small wind energy system” means a wind energy system that is used to generate electricity, has a nameplate capacity of 100 kilowatts or less and has a total height of 170 feet or less, where “total height” means the vertical distance from ground level to the tip of a wind generator blade when the tip is at its highest point. A wind energy system that has a nameplate capacity of more than 100 kilowatts or a total height of more than 170 feet shall be classified as a power generation plant.

i. “Solar farm” means an array of multiple solar collectors on ground-mounted racks or poles that transmit solar energy and is the primary land use for the parcel on which it is located.

j. “Substation/distribution equipment, indoor” means a facility, other than a transmission tower and contained entirely within a building, which performs either of the following functions:

j-1. Aids in the distribution of a utility, including but not limited to electric power or telephone service.

j-2. Is used to operate, maintain or provide access to facilities for the transmission of voice, data, text, internet, sound or full-motion-picture video between network termination points.

k. “Substation/distribution equipment, outdoor” means a facility, other than a transmission tower and not contained entirely within a building, which performs either of the following functions:

k-1. Aids in the distribution of a utility, including but not limited to electric power or telephone service.

k-2. Is used to operate, maintain or provide access to facilities for the transmission of voice, data, text, internet, sound or full-motion-picture video between network termination points.

16. TEMPORARY USES. a. “Seasonal market” means a temporary facility used to conduct retail trade for a period not exceeding 180 days in a calendar year.

b. “Temporary real estate sales office” means a temporary office, including a manufactured building, for marketing, sales or rental of residential, commercial or industrial development for a maximum period of one year from the date of permit approval.

c. “Concrete/batch plant, temporary” means a temporary facility that produces or processes concrete or asphalt only for use in a particular construction project and only for the duration of that project.

d. “Live entertainment special event” means a concert, carnival, circus, fair or similar event lasting less than 15 days.

295-205. Rules of Measurement. The following rules of measurement shall be used in the administration and enforcement of this chapter:

1. **BUILD-TO LINE.** The build-to line shall be measured so that the accuracy of the building placement shall be within one foot, except that no encroachment into public rights-of-way shall be permitted unless allowed or authorized pursuant to the provisions of ch. 245.

3. **BUILDING HEIGHT.** Building height shall be measured from finished grade to the highest point of the building. Where a building is located on a sloping lot, the building height shall be the average of the building height on each building elevation, measured at the mid-point of the elevation.

5. **DISPLAY AREA.** The display area of a sign shall be measured as the area, in square feet, of the smallest rectilinear polygon, with a maximum of 8 sides, that describes the portion of the sign which encloses all lettering, wording design, or symbols together with any background that, through the use of illumination, color or other techniques, helps the sign stand out from its surroundings. The following rules shall also be used in measuring display area:

a. Where a sign has multiple display surfaces and any 2 of these display surfaces are parallel and face in opposite directions, only one of the parallel display surfaces shall be included when calculating display area.

b. For an internally-illuminated awning sign, the display area shall be calculated as the height of the awning multiplied by its width.

c. The area of temporary signs shall not be included in computation of allowable area for permanent signage. Only one of the parallel display surfaces shall be included when calculating display area.

d. Where a sign contains elements of both type A and type B signs, neither element shall exceed the maximum size for its sign type, and the combined area of both elements shall not exceed 100% of the combined total permitted area for the 2 sign types. For example, a freestanding sign in an LB1 district could include a 40-square-foot type A element (40% of the maximum size of 100 square feet) and a 30-square-foot type B element (60% of the maximum size of 50 square feet).

**Figure 295-205-5
MEASUREMENT OF DISPLAY AREA**

Zoning 295-205-7

7. FLOOR AREA. Floor area shall be measured as the sum of the actual gross horizontal area of all floors, mezzanine space and interior balconies located at or above the established grade of the lowest abutting street, excluding:

- a. Attic space having less than 7 feet of head room.
- b. Any space devoted to off-street parking or loading.
- c. A utility room or furnace room.

9. FLOOR AREA, GROSS. Gross floor area shall be measured as the total horizontal area in square feet of all floors within the exterior walls of a building, but not including the area of unroofed inner courts or shaft enclosures.

11. FLOOR AREA RATIO. Floor area ratio shall be measured as the ratio of floor area to lot area. For example, a floor area ratio of 2:1 means that there are 2 square feet of floor area for every one square foot of lot area.

13. FRACTIONS. When calculations result in fractions, the results shall be rounded as follows:

a. **Minimum Requirements.** When a regulation is expressed in terms of a minimum requirement, any fractional result shall be rounded up to the next consecutive whole number. For example, if a minimum requirement of one tree for every 30 feet is applied to a 40-foot strip, the resulting fraction of 1.33 shall be rounded up to 2 required trees.

b. **Maximum Amounts.** When a regulation is expressed in terms of a maximum amount, any fractional result shall be rounded down to the next lower whole number. For example, if a maximum of one dwelling unit for every 3,000 square feet is applied to an 8,000-square-foot site, the resulting fraction of 2.67 shall be rounded down to 2 dwelling units.

15. LOT COVERAGE. When measuring lot coverage, the following shall not be included:

- a. Eaves projecting less than 2.5 feet from a building.
- b. Trellises, arbors, pergolas and similar structures which do not have solid roofs.
- c. The portion of any uncovered and unenclosed deck, porch, landing, balcony, planter or stairway that is less than 36 inches above grade.

17. MEASURING DISTANCES. Distances shall be measured using the following standards:

a. **Horizontal Distances.** When determining distances for setbacks and structure dimensions, all distances shall be measured along a horizontal line from the appropriate line, edge of building, structure, storage area, parking area or other object. These distances shall not be measured by following the topography of the land.

b. **Shortest Distances.** When measuring a required distance, such as the minimum distance between a structure and a lot line, the measurement shall be made at the closest or shortest distance between the 2 objects, features or points.

c. **Vehicle Stacking or Travel Areas.** Minimum travel distance for vehicles, such as garage entrance setbacks and stacking lane distances, shall be measured down the center of the vehicle maneuvering lane. For example, a curving driveway or travel lane is measured along the arc of the driveway or traffic lane.

d. **Distance Between Uses.** Whenever the provisions of this chapter require measuring the distance between existing and proposed uses, the distance shall be measured as the shortest distance between lot lines of the 2 uses.

19. SIGN HEIGHT. The height of a sign shall be determined by measuring the distance between the highest point of the actual sign structure and the finished grade directly below it. Sign height shall be measured in feet.

21. TRANSMISSION TOWER HEIGHT. The following principles shall apply when measuring the height of a transmission tower:

a. The transmission tower height shall include the height of any reception/transmission systems extending above the top of the tower.

b. Transmission tower height shall be measured in feet.

c. For a freestanding tower, the height of such tower shall be the height of the tower above finished grade, measured at the center of the tower.

d. Unless otherwise noted in this chapter, whenever a transmission tower is mounted to a building or other structure, the height of such tower shall be considered to include both the height of the tower itself plus the height of the building or structure from the ground to the lowest point of attachment.

23. UPPER STORY SETBACK. The upper story setback shall be measured as the distance that the exterior wall of an upper floor is recessed from the exterior wall of the floor below.
